

# How many Pfizer or Moderna COVID-19 vaccines do I need?

People age **5 years or older**,  
**not immunocompromised**

**One updated  
vaccine dose**

**whether or not you've  
received any previous  
vaccine doses!**

People age **6 months to 4 years**,  
**not immunocompromised**

**Three updated  
Pfizer doses**

or

**Two updated  
Moderna doses**

Brands may be mixed in some cases. Talk to your doctor.

People age **6 months or older**,  
**immunocompromised**

**At least one updated dose**

Some immunocompromised people may need additional updated doses, depending on age and the number of doses previously received. Talk to your doctor.

Dose guidance is different for non-mRNA vaccines (Novavax)! Talk to your doctor or find guidance online: [cdc.gov/covid19](https://www.cdc.gov/covid19).
